ABOUT GSS SAFETY

GSS Safety is a manufacturer specializing in a variety of ANSI/ISEA approved Hi-Visibility apparel including vests, T-shirts, waterproof jackets, waterproof rain gear, accessories, and more. Our goal is to constantly strive to protect workers from serious hazards of low visibility.

Our products have been tested by most International standards like ANSI/ISEA 107-2015. We offer many styles and designs that will satisfy the needs of many customers. By being a direct manufacturer, we can provide fast turnaround. We also can provide private labeling, logo imprinting, custom designs and unique packaging upon request.

If you have any questions or would like to have a catalog, please feel free to contact us at sales@GSSsafety.com.

Please use the following key to navigate through each item's features. They act as a quick visual guide to the products attributes. Full details are available in the text below each item. For full size chart look at page 41.

COLORFUL PPE

we stand out from the crowd

INCIDENT COMMAND SAFETY VESTS IN ALL COLORS

In emergency situations it's important for people to quickly identify groups of emergency responders and volunteers in a certain area. Incident command vests allow different groups to wear uniquely colored reflective vests so they can be easily identified by teams, volunteers, or civilians. This is crucial when tensions are high, and fight or flight emotions are running high during critical emergencies or accidents.

CORPORATE COLORS FOR COMPANY IDENTITY

Research has revealed that a signature color can increase brand recognition by 80%. Even without seeing their logo, most people could recognize a Starbucks' drink by its characteristic green straw. According to Reboot's study, when shown a selection of five made up company logos 78% could recall the primary color of the logo. compared to only 43% who were able to remember the name.

DIFFERENT COLORS FOR DIFFERENT GROUPS IN WORKING FIELD

We see more and more company use colorful vests in the work field to identify the different group of people. It is more efficient for coworkers and supervisor to know their group. For example, in Amazon warehouse, people wear red colored vests for all new hires and then switch to lime vests after the complete their training.

ONYX collection offering high performance fabrics and unique designs. This collection offers quality with excellent value plus feature-filled styles. From snag protection ratings to ripstop and teflon coating, **ONYX** is the go-to brand for functional reflective apparel with optimal comfort and performance.

INNOVATION FOR BETTER COMFORT

- Ripstop fabrics are woven fabrics, often made of nylon, using a special reinforcing technique that makes them resistant to tearing and ripping.
- Comfort Reflective Tape provides more flexibility over solid tape.
- Teflon Coated Fabrics treated for repellency fight off dry soil and nasty, unpredictable spills and splashes, allowing liquids to bead up and roll off. Liquid spills can easily be wiped away when blotted with a clean cloth, and dry soil can be brushed off easily.
- Mix & Match A double zipper system connects the inner coat with outer shell. Matched pants available too.

ANSI/ISEA 107-2015 INFORMATION

The 2015 revision of **ANSI/ISEA 107** combines the previously separate 107 and 207 standards into a single document for administrative simplicity. The new version includes a "Type" structure that keeps off-road ("Type O"), roadway ("Type R"), and public safety ("Type P") garments separate by application, and more closely aligns with the definitions and implementation of the U.S. Federal worker high visibility regulation residing in the Manual on Uniform Traffic Control Devices (*MUTCD*). Under the new standard, any Type R roadway garments are compliant for workers on or near a public access roadway, and Type P public safety garments add a compliance option for emergency and incident responders.

Our New Premises

We are excited to announce that we moved to the new facility at 1261 Claremont Rd, Carlisle, PA 17015 since June 1st 2018.

The larger facility provides much more warehouse space to support our growth. We look forward to providing our customers with better customer service and fast delivery in the future.

Your support and continued partnership is valuable to us. We thank you for everything you do and look forward to many new opportunities for continued growth.

by **GSS**

8515/8517

industrial hi-visibility safety apparel

www.GSSsafety.com

BRAND INTRODUCTION

QUARTZ is a NEW collection starting 2020 that specialized in combining functional workwear with high visibility. We understand the importance of visibility for all field workers. To be seen is and will continuously remain our mission to protect more field workers and more industries.

In the **QUARTZ** collection, you will find more daily workwear built in with reflection and visibility material. The fabric we pick will all have cotton blended with other fiber/yarn. In the past years, we have heard more and more field workers stating cotton is the best fabric for workers even though the polyester provided more wicking, breathability and other facts. We will keep sourcing and inventing new comfortable garments for daily field workers to make their work safety the best experience ever.

What is Hi-Vis Red?

We are excited to announce that we moved to the new facility at 1261 Claremont Rd, Carlisle, PA 17015 since June 1st 2018.

The larger facility provides much more warehouse space to support our growth. We look forward to providing our customers with better customer service and fast delivery in the future. Your support and continued partnership is valuable to us. We thank you for everything you do and look forward to many new opportunities for continued growth.

cert

what is cert?

The **Community Emergency Response Team (CERT)** program educates volunteers about disaster preparedness for the hazards that may impact their area and trains them in basic disaster response skills, such as fire safety, light search and rescue, team organization, and disaster medical operations.

CERT offers a consistent, nationwide approach to volunteer training and organization that professional responders can rely on during disaster situations, allowing them to focus on more complex tasks.

The garment in this section is helping **GERT** to have the green color to go to field.

the story of lil cece

Lil Cece is a little and energetic girl running here and there. Being a sales mom specialized in reflective apparel for adults, I have been always asking myself if children should wear high visibility clothing, my answer is yes.

As we all know, the high visibility apparel is designed and constructed to increase visibility to people working in hazardous situations under all light conditions. It prevent people being exposed or struck by hazards from moving vehicles, equipment and machinery, or wherever a risk assessment indicates a need to be seen.

When our kids stand outside waiting for the school bus and playing with neighbors, when our kids riding bikes with parents on the road, when our kids doing the out door activities, they are all under risk of being exposed or struck by hazards from moving vehicles. The high visibility apparel can protect kids to be seen.

The goal of **Lil Cece** is creating safety apparel that comfortable to wear, easy to clean, and **KIDS LOVE TO WEAR.**

what is type p?

What is Type P?

Type P ("public safety") – Occupational HVSA for Emergency and Incident Responders and Law Enforcement Personnel.

Type P HVSA provide daytime and nighttime visual conspicuity enhancement for emergency and incident responders and law enforcement personnel in occupational environments which include exposure to traffic (vehicles using the highway for purposes of travel) from public access highway rights-of-way, or roadway temporary traffic control (TTC) zones, or from work vehicles and construction equipment within a roadway temporary traffic control (TTC) zone or from equipment and vehicles within the activity area.

Type P HVSA provides additional options for emergency responders, incident responders and law enforcement who have competing hazards or require access to special equipment.

Identification of Personnel (Type P)

A method of identifying the public safety entity such as an identification panel and/or trim may be incorporated into the HVSA. Public safety industries may be identified with the specific names and colors:

Red: Fire Service

Green: Emergency Medical Service (EMS)

Blue: Law Enforcement

what is class 3?

What is Class 2, Class 3 or Class E?

Performance Class 2 (Type R or P)

Performance Class 2 provides for the use of additional amounts of high-visibility materials, which may allow design opportunities to define the human form more effectively. Performance Class 2 HVSA have the potential to provide longer detection and identification distances, and increased conspicuity performance compared to Performance Class 1 HVSA.

NOTE: Performance Class 2 HVSA is considered a minimum practice for HVSA in roadway rights-of-way and temporary traffic control (TTC) zones, as required in the 2009 edition of the MUTCD.

Performance Class 3 (Type R or P)

Performance Class 3 can offer greater visibility to the wearer in both complex backgrounds and through a full range of body movements by mandatory placement of background, retroreflective and combined-performance materials on sleeves and pant legs (if present). Regardless of the area of materials used, a sleeveless garment or vest alone shall not be considered Performance Class 3.

Supplemental Class E

Pants, bib overalls, shorts, and gaiters shall be designated Class E. Class E items shall not be worn alone for the purposes of meeting HVSA PPE requirements. When a Class E item is worn with Performance Class 2 or Class 3, the overall classification shall be Performance Class 3.
